Report Status: Final

MOLECULAR BIOLOGY

Test Name	Test Result	Biological Reference Range	Sample
2019 Novel Corona Virus Real Time PCR			
Sample Type	Nasopharyngeal / Oropharyngeal		
COVID-19 E Gene	NEGATIVE		
COVID-19 RdRp Gene	NEGATIVE		
COVID-19 N Gene	NEGATIVE		
Sample Quality Check(RNase-P/MS2)	PASSED		
Interpretation	NEGATIVE FOR SARS CoV-2		

COMMENT:

1. Testing for SARS-CoV-2 was performed on a commercial ICMR approved RT-PCR kit/ US FDA EUA/CE IVD approved kits.
2. Negative results do not preclude SARS-CoV-2 and should not be used as the sole basis for patient management decisions. Kindly repeat test after 48 to 72 hrs if clinically suspected.
3. Viral nucleic acid may persist in vivo independent of virus viability. Detection of the analyte target does not indicate that the viruses are infectious or are the causative agent of symptoms.
4. False negative results may be attributable to improper sample collections, improper transport, treatment, PCR inhibitors, etc.
5. The results of this test pertain to the sample received.
6. As per ICMR guidelines, the contact and test details of all patients undergoing COVID-19 testing need to be uploaded on the ICMR reporting portal and the same will be accessed by stakeholders including IDSP, MoHFW for timely initiation of contact tracing and appropriate control measures.
7. ICMR ID of Neberg Anand Reference Laboratory, Bangalore - NEUBE001
8. Ct Values stated above may be influenced by pre-analytical factors including sample type, sample collection, testing kit used and between testing laboratories, and are not indicative of severity of disease or disease progression. It is recommended that these values should not be used in therapeutic or patient management related decisions.
